Importar el cuaderno 2

Ejercicio 1: Crear y configurar un clúster de propósito general. 3

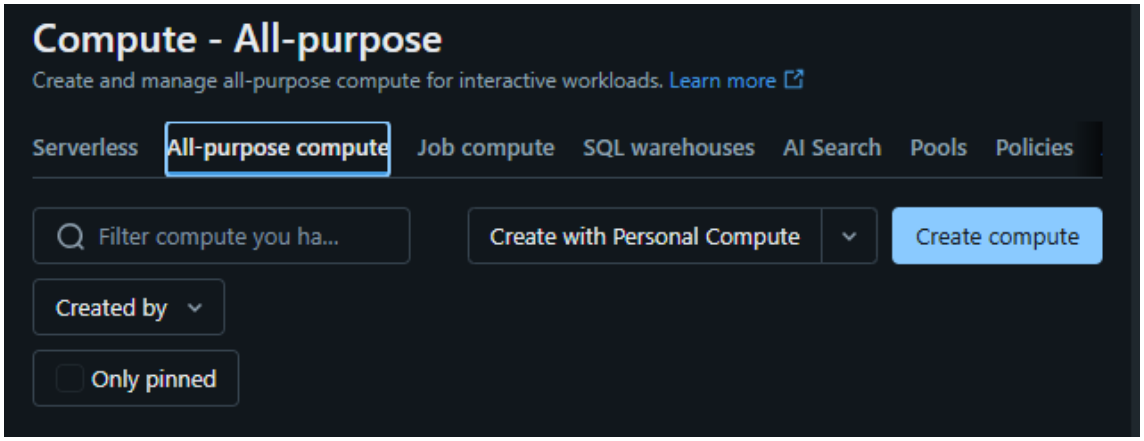

Importar el cuaderno

Igual que en el laboratorio uno importamos el cuaderno que usaremos para esta parte

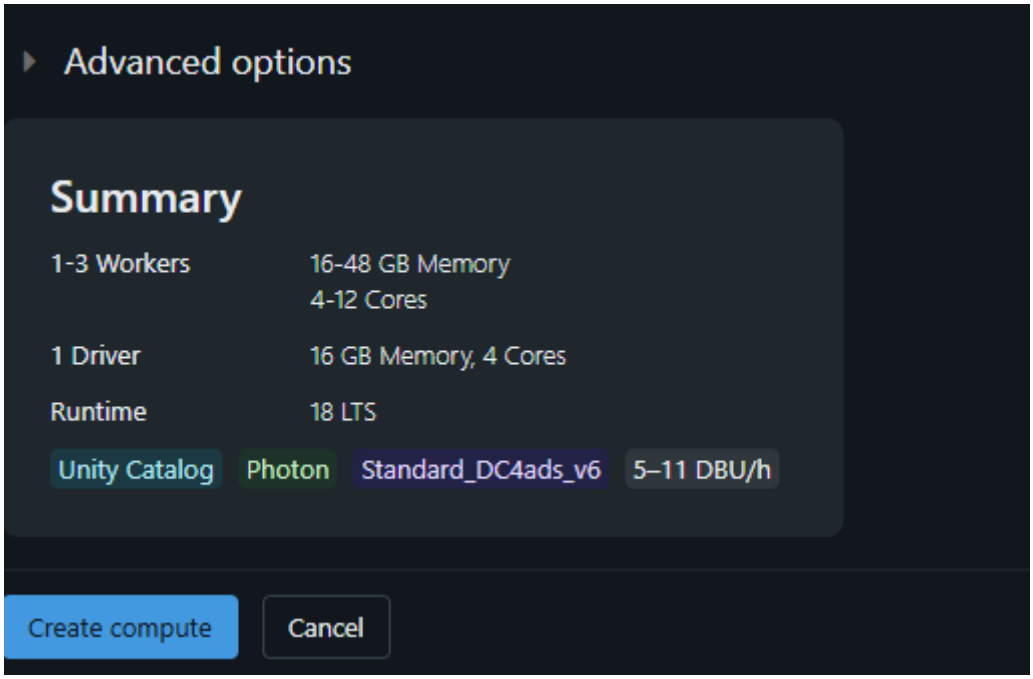

Ejercicio 1: Crear y configurar un clúster de propósito general.

Vamos al apartado compute

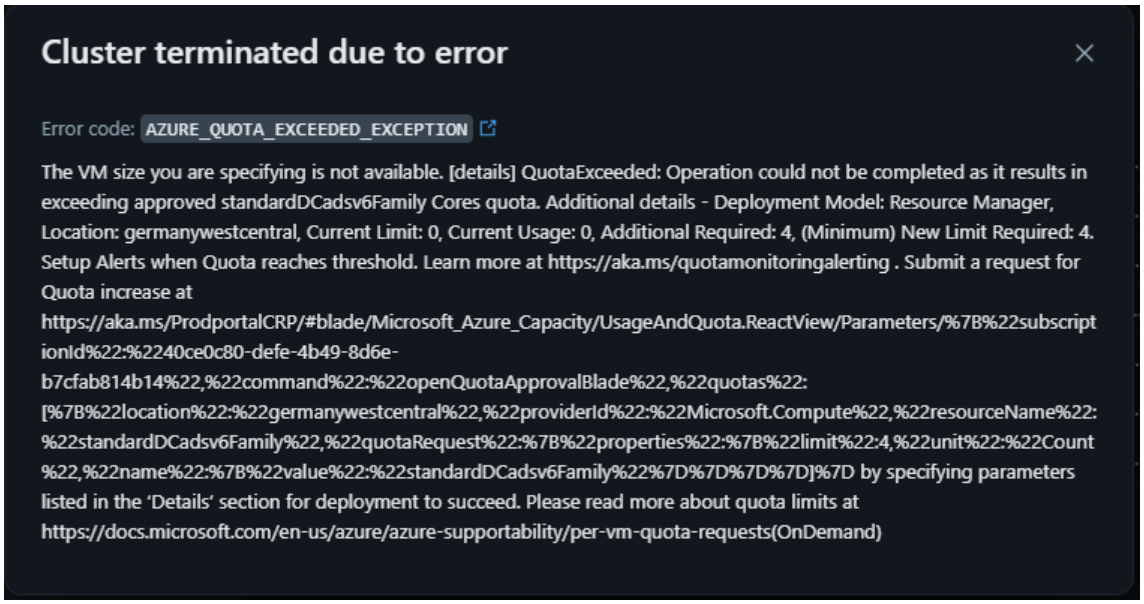

y le damos a créate compute

En la pestaña que se nos abre configuramos el nombre y le damos a crear

No puedo continuar por un error de cuota

Cluster terminated due to error
Error code: AZURE_QUOTA_EXCEEDED_EXCEPTION
The VM size you are specifying is not available. [details] QuotaExceeded: Operation could not be completed as it results in exceeding approved standardDCadsv6Family Cores quota. Additional details - Deployment Model: Resource Manager, Location: germanywestcentral, Current Limit: 0, Current Usage: 0, Additional Required: 4, (Minimum) New Limit Required: 4. Setup Alerts when Quota reaches threshold. Learn more at https://aka.ms/quotamonitoringalerting . Submit a request for Quota increase at https://aka.ms/ProdportalCRP/#blade/Microsoft_Azure_Capacity/UsageAndQuota.ReactView/Parameters/%7B%22subscriptionId%22:%2240ce0c80-defe-4b49-8d6e-b7cfab814b14%22,%22command%22:%22openQuotaApprovalBlade%22,%22quotas%22:[%7B%22location%22:%22germanywestcentral%22,%22providerId%22:%22Microsoft.Compute%22,%22resourceName%22:%22standardDCadsv6Family%22,%22quotaRequest%22:%7B%22properties%22:%7B%22limit%22:4,%22unit%22:%22Count%22,%22name%22:%7B%22value%22:%22standardDCadsv6Family%22%7D%7D%7D%7D]%7D by specifying parameters listed in the 'Details' section for deployment to succeed. Please read more about quota limits at https://docs.microsoft.com/en-us/azure/azure-supportability/per-vm-quota-requests(OnDemand)
